

How to solve inventory availability issues

This guide provides a step-by-step walkthrough for checking inventory availability and successfully registering your movement / picks.

1

Navigate to inventory summary in Business Central, and find the lot / Load carrier that you are having issues with.

Dynamics 365 Business Central

4 Click "Actions"

The screenshot shows the 'Inspection Orders' table in a software interface. The table has columns: Lot No., Load Carrier No., Status, Location Code, Bin Code, Expiration, Load Carrier, and Date of Entry. The third row is highlighted. A context menu is open over the third row, with the 'Actions' option circled in orange. The menu also includes 'Create Inspection Orders', 'Related', 'Automate', 'Fewer options', 'Functions', 'Create Internal Movement', and 'Pick Availability'.

15 Here you can get a clear view of the lot's current availability.

For example, Lot PO0036319-1 has a total warehouse quantity of 5,606. However, 5,000 units are currently in a Pick, which means that quantity is reserved and not available for any other transaction.

The screenshot shows a dialog box titled 'Pick/Production Provision Availability'. It has a 'Calculate availability' button and a 'Page' dropdown. Below is a table showing the availability for Lot PO0036319-1. The 'Qty. On Warehouse' is 5,606. The 'Qty. in Pick' is 5,000, which is circled in orange. The 'Qty. in Production P...' is 0.
